Autani's EnergyCenter Platform Expands to Include Sunrise Technologies Wireless Outdoor Fixture Controllers

Columbia, MD – Autani, LLC, a proven leader in building controls and IoT, expands the scope of its EnergyCenter platform by adding wireless, direct, real-time controls of outdoor fixtures using the Sunrise Technologies WALI (Wireless Area Lighting Interface) in the place of a NEMA socket mounted photocell. In partnership with Sunrise Technologies, Inc., a leading producer of accurate, reliable, energy-efficient and innovative lighting control products, EnergyCenter allows customers to customize an astronomical clock operation and implement advanced scheduling of dimming features throughout their premise. Now, lights in the building and throughout the facility at large can be zoned geographically through EnergyCenter's centralized manager.

“By expanding EnergyCenter's wireless capabilities to include the Sun-Tech WALI outdoor fixture controller, we have the ability to offer outdoor centralized lighting controls that can be customized based on season and premise layout throughout the year,” said Scott Metker, Chief Operating Officer for Autani. “For example, users will be able to adjust their light settings and timers around holidays, seasons, and special events without having to touch a single fixture. EnergyCenter's capability goes beyond a traditional photocell by centralizing the building's controls in a comprehensive, strategic platform and providing greater autonomy to our customers.”

About Sunrise Technologies, Inc.

Sunrise Technologies, Inc., (www.sun-tech.biz), with near 70 years of industry experience assimilated through product development and acquisition, is the world's largest manufacturer of Outdoor Roadway Lighting Controls. Products include: Contactors, LED Long Life, Dimming, Wireless Programmable and Mesh Networked Controls for Utility, Commercial and Industrial outdoor lighting applications. Sunrise Technologies is a unit of Electro Switch Corp. (www.electroswitchcorp.com)

About Autani, LLC

Autani, LLC (www.autani.com) is a Building Automation Provider with a proven track record of reducing energy consumption while providing the analytics to power next-generation building management applications. At the core of our product offering is EnergyCenter, an open standards appliance that connects Lighting, Metering, HVAC, Refrigeration and Sensors to control, monitor and verify energy consumption through a single, powerful system with either wireless or wired connectivity. Autani's easy-to-understand dashboard and analytics tools empower facility managers to optimize energy use, identify process inefficiencies, and improve space utilization. Autani's energy management solutions are designed and manufactured in the USA.
